95 <sup>th</sup> (near worst)	12	16	5	18	15	17	11	10

## Notes:

<sup>a</sup> Percentiles for top-box and bottom-box scores were calculated for the 2,864 hospices for which CAHPS Hospice Survey measure scores were publicly reported on Hospice Compare for April 1, 2016 through March 31, 2018. Scores have been adjusted for survey mode and case mix. Detailed information regarding the content of CAHPS Hospice Survey measures and how top- and bottom-box scores are calculated and adjusted is available at: <a href="https://hospicecahpsurvey.org/en/public-reporting/scoring-and-analysis/">https://hospicecahpsurvey.org/en/public-reporting/scoring-and-analysis/</a>.

<sup>b</sup> Top-box scores summarize the most positive responses to CAHPS Hospice Survey items. Percentiles indicate how often caregivers gave positive assessments of hospice experience. *With top-box scores, the higher, the better.* For example, on "Communication with Family," 5% of hospices

scored 89 or higher (95th percentile) in the top box, while 5% scored 71 or lower (5th percentile). The median (50th percentile) score on this measure was 81.

<sup>c</sup> Bottom-box scores summarize the least positive responses to CAHPS Hospice Survey items. Percentiles indicate how often caregivers gave negative assessments of hospice experience. *With "bottom-box" scores, the lower, the better.* For example, on "Communication with Family," 5% of hospices scored 4 or lower (5th percentile) in the bottom box, while 5% scored 12 or higher (95th percentile). The median (50th percentile) score on this measure was 7.
